AI Racing League – Go Full Speed with IBM Bob

Agenda

- Program Overview
- What is TORCS & IBM Bob
- Learning Path Overview
- IBM SkillsBuild Platform Navigation
- Certificates
- Cohort Schedule
- Delivery Framework
- Learner Journey
- Summary :Program Offerings
- Zoom Channel Support
- FAQS
- Feedback Survey & Thank you note

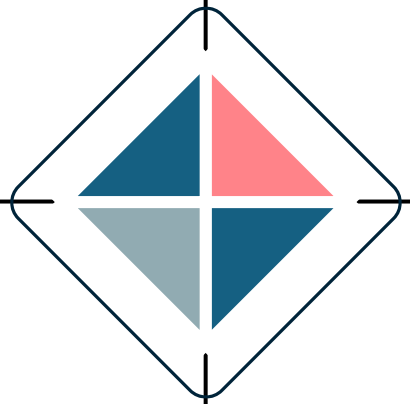

Program Overview

Program Design

- AI Racing League learning plan
- TORCS simulator project

Learning Methodology

- Self-paced learning
- Mentor-guided project support
- Technical Assistance Support via Email, Whatsapp Community and Zoom chat

Lab Access

- Platform – IBM SkillsBuild
- Racing simulator & AI assistant – TORCS + IBM Bob

Learning Activities

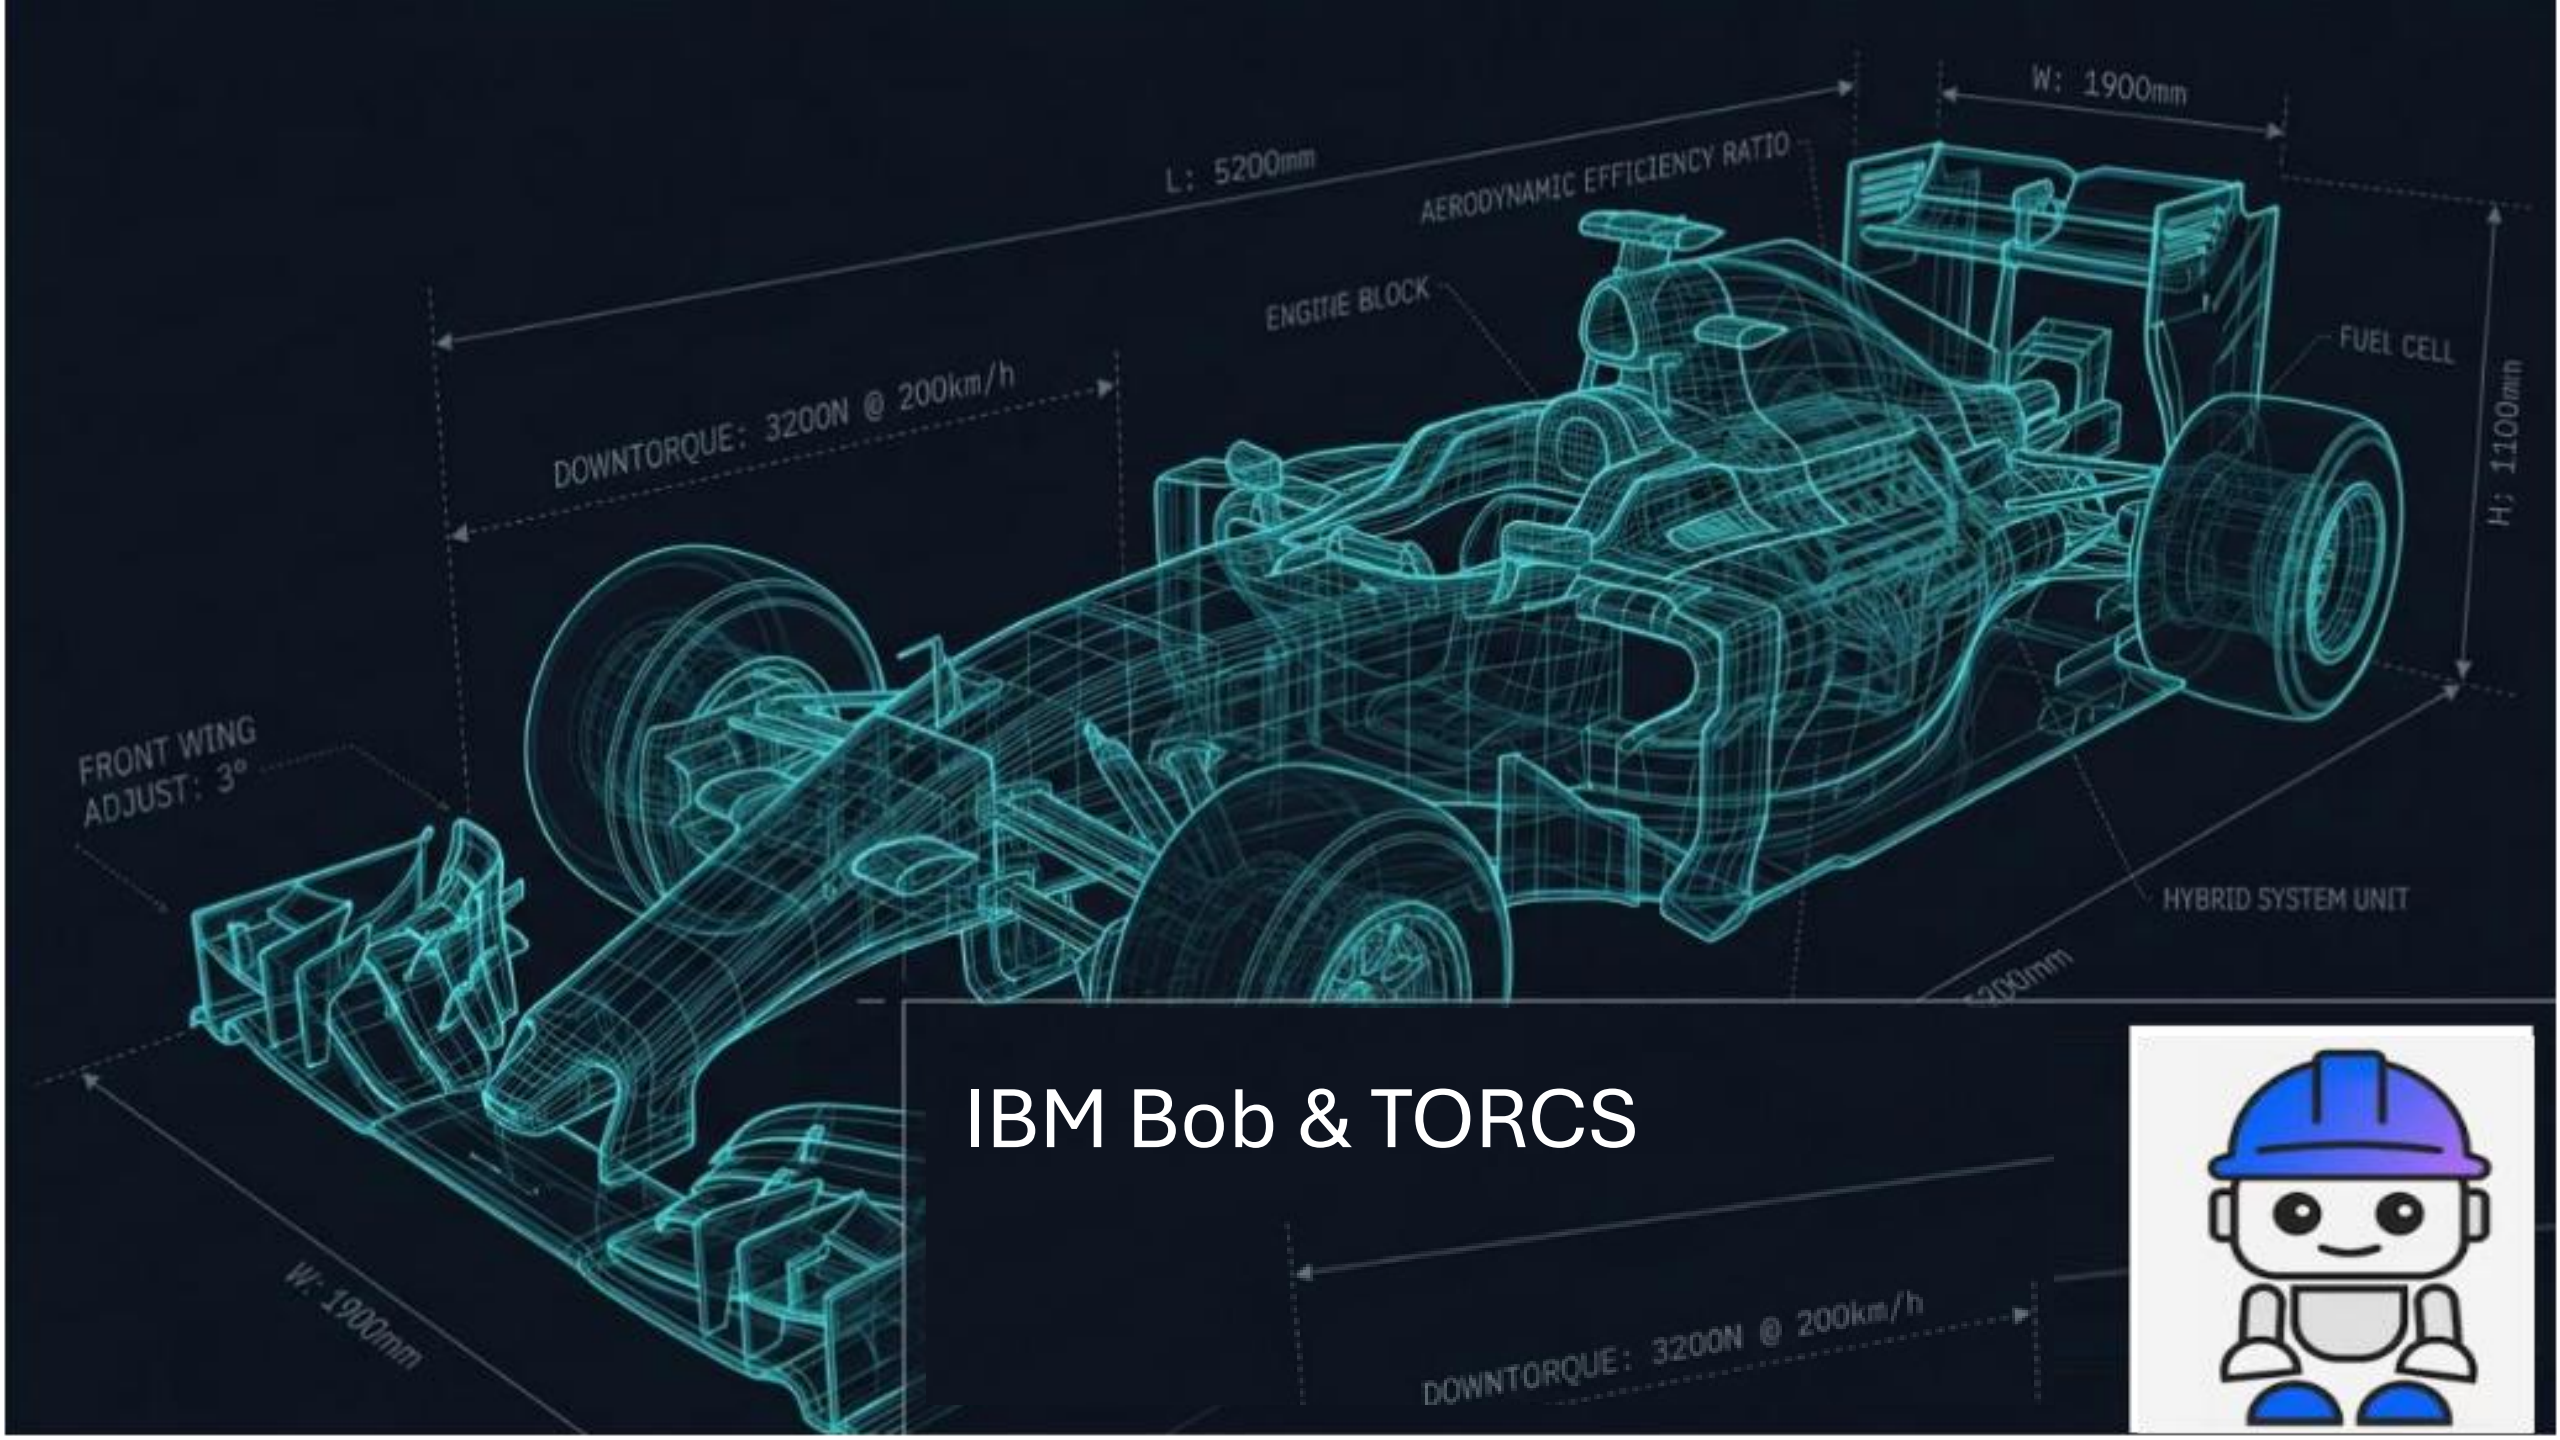

- Complete learning activities individually.
- Learn Python basics for the race-car script
- Use IBM Bob to analyse & improve your code.
- Work solo or in a team on the TORCS project.
- Submit to SkillUp for mentor evaluation.
- Top 3 win the Winner Certificate.

What is TORCS & IBM Bob?

SkillUp

IBM Bob & TORCS

MISSION OVERVIEW:

Use Python code to race your F1 car

Utilise IBM Bob as part of the crew to improve the base Python script and achieve a better lap time

E Track 2

KEY PARAMETERS

PLATFORM: TORCS (The Open Race Car Simulator)	CORE AI TECH: IBM Bob
LANGUAGE: Python	RACE TRACK: E Track 2

Technical Schematics: Your Technology Stack

PILLAR_01: THE CHASSIS

TORCS (Simulator)

Provides the robust physics engine, track environment, and vehicle dynamics for the AI to navigate.

PILLAR_02: THE ENGINE

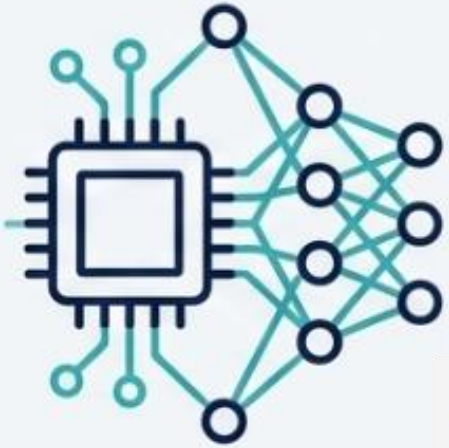

Python (Latest 3.x.x)

The connective tissue and script environment where your driving algorithms are built and executed.

PILLAR_03: THE BRAIN

IBM Bob https://ibm.biz/IBMBoBUniversity

Generative AI used to troubleshoot logic, write code, and massively accelerate software development.

SYSTEMS CHECK: Platform & Installation Protocols

Latest version of Python 3.x.x

Windows

- Full native support.
- **Quick Start Guide**: Step-by-step instructions.
- **Link**: https://youtu.be/rRbpOUH0IFQ

Download TORCS and Python scripts

https://ibm.box.com/v/TORCSdownloadzip

Latest version of Python 3.x.x

macOS

- Requires the use of Wine.
- **WineHQ**: https://www.winehq.org/
- **MacOS Extra Steps Guide**:
- https://ibm.box.com/v/MacOSExtraExt

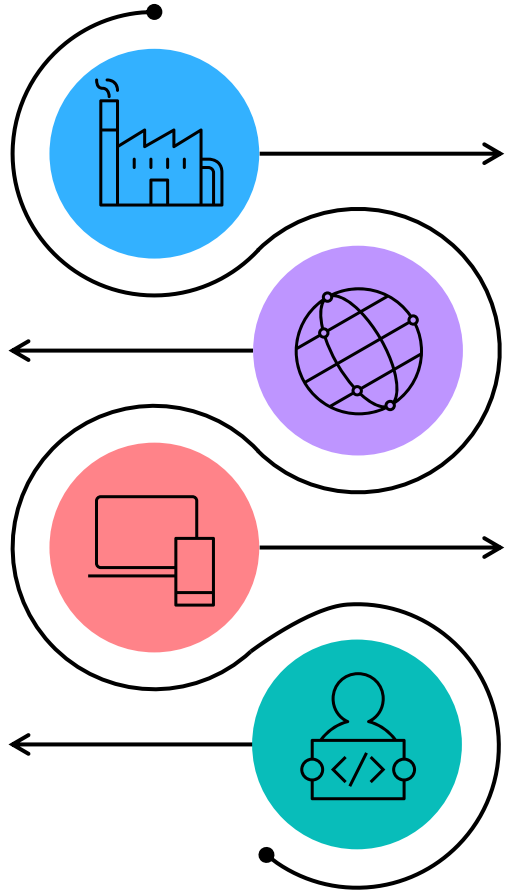

Update the code and run your lap

Your goal – get the fastest lap time with no car damage

1. Make a copy of your python race code
2. Discuss the recommendations made by IBM Bob with your team
3. Ask IBM Bob to implement the recommendation (or one of your own)
4. Start Torcs and run your updated code
5. Beat the original time with zero car damage

Why This Cohort Is Different?

Mentor-Evaluated Project
Unlike other cohorts, your project is submitted directly to your mentor for evaluation — not just auto-graded on the platform.

Just 2 Weeks, Project-First
A shorter, focused cohort built entirely around one hands-on challenge: the TORCS racing project, guided by your mentor throughout.

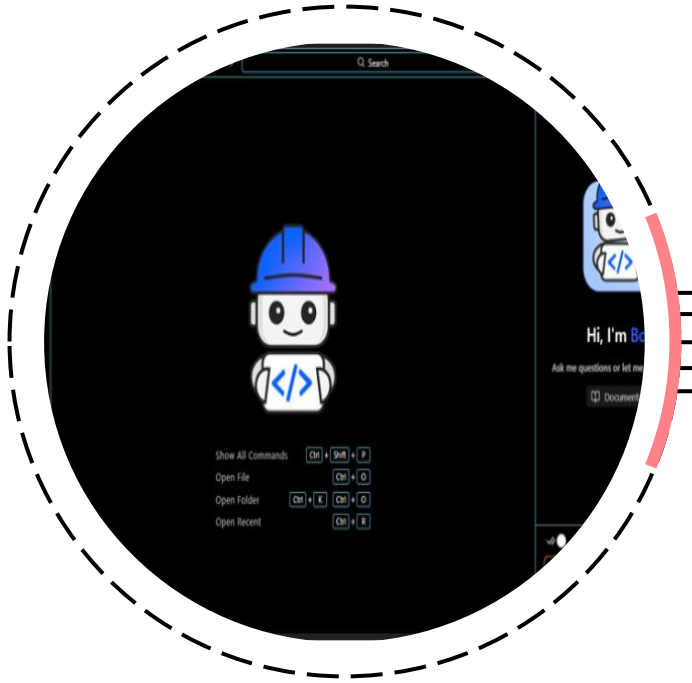

Work Solo or as a Team
Take on the TORCS project individually or in a group — while mandatory learning activities are still completed by each learner.

Two Certificates Up for Grabs
Every learner who completes the requirements earns a Program Certificate — and the top 3 also earn an exclusive Winner Certificate.

SkillUp

In collaboration with
IBM **SkillsBuild**

TORCS Project: Step by Step

Download TORCS & the Python script

Ask IBM Bob to analyse & improve your code

Beat your time, zero car damage

Run the Corkscrew track, 1 lap

Test your lap — note your time

SkillUp

In collaboration with IBM **SkillsBuild**

Learning Path

Course Start Date: 28th Sept
Course End Date: 11th Oct

Complete the Learning Plan (self-paced)

Improve your code with IBM Bob

Set up TORCS & run your first lap

Submit your project for mentor evaluation

IBM SkillsBuild Completion Certificate

This certificate is presented to

khushboo khera

for the completion of

AI racing league: Build with AI, go full speed with IBM Bob | 3Q 2026 | English - GMT

(PLAN-6FA860C53B3A)

According to the Your Learning Builder - Plans system of record

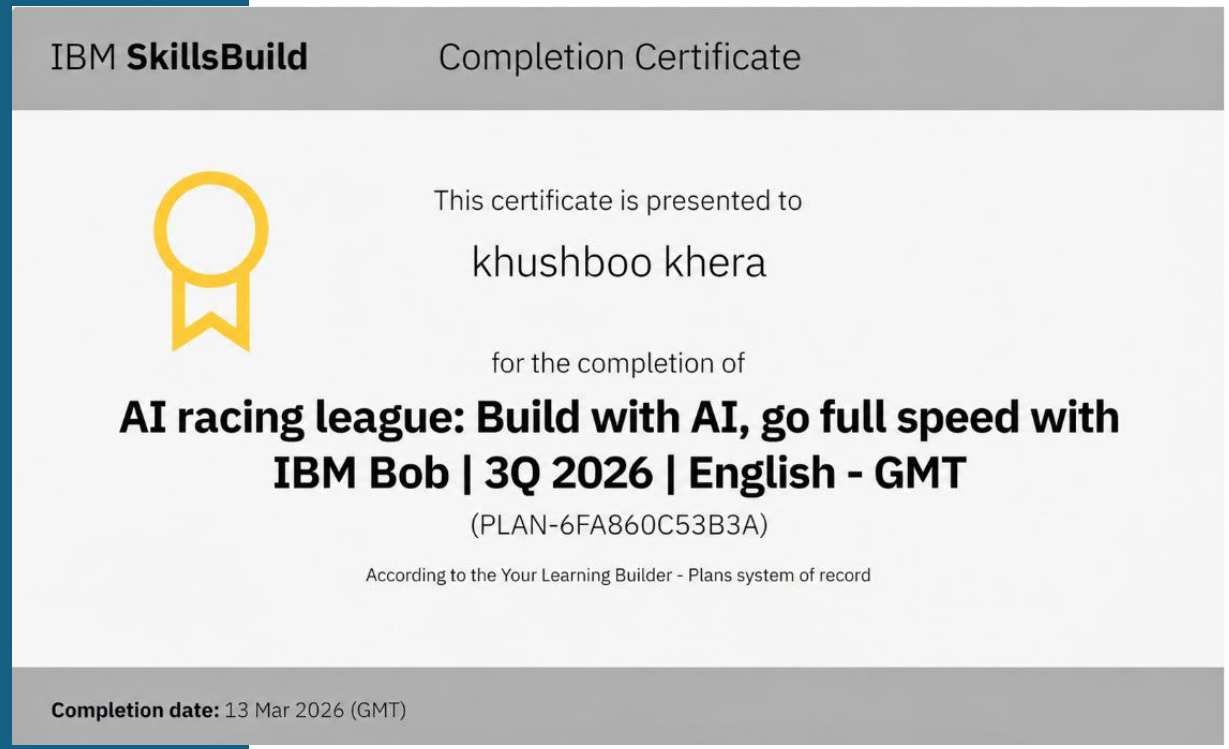

Completion date: 13 Mar 2026 (GMT)

SkillUp

In collaboration with

IBM **SkillsBuild**

Program Certificate

IBM **SkillsBuild** Completion Certificate

This certificate is presented to

khushboo khera

for the completion of

AI racing league: Build with AI, go full speed with IBM Bob | 3Q 2026 | English - GMT

(PLAN-6FA860C53B3A)

According to the Your Learning Builder - Plans system of record

Completion date: 13 Mar 2026 (GMT)

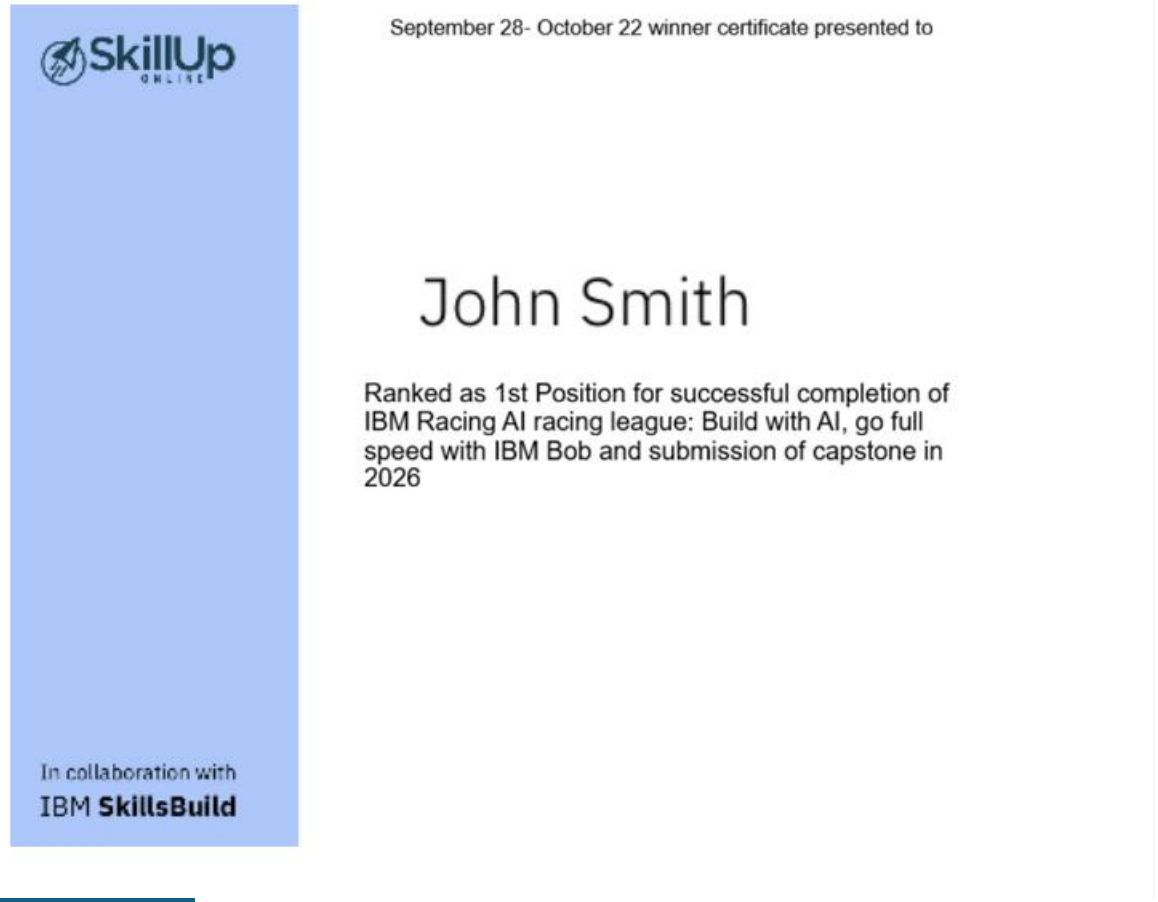

1. Complete all mandatory learning activities individually
2. Complete and submit the TORCS project (solo or team)
3. Awarded to every learner who meets both requirements
4. Download your Program Certificate from SkillsBuild

SkillUp

In collaboration with

IBM **SkillsBuild**

Winner Certificate

1. Finish in the top 3 fastest lap times, zero car damage
2. Evaluated and ranked by the mentor
3. Awarded in addition to your Program Certificate
4. A special recognition for the top performers

IBM **SkillsBuild**

Cohort Schedule

Enrolment Period
Sept 7 – Sept 25

Enrol

Details

Enrol via the SkillsBuild learning plan during this window.

Orientation Sessions
Sept 10, 17 & 24

Orient

Details

Live orientation sessions, 3 PM GMT.

Course + Instructor Sessions
Sept 28 – Oct 11

Race

Details

4 instructor-led sessions: Sept 29, Oct 1, Oct 6 & Oct 8. Self-paced learning + TORCS project throughout.

Closing Ceremony
Oct 22

Close

Details

Closing ceremony – Program & Winner Certificates announced.

IBM **SkillsBuild**

Summary : Program Overview

AI Racing League	
Total Hours	**10 hours**
Programme Access	2-Week (Project Cohort)
A. Mentor-Guided Support	**Throughout Cohort**
• TORCS Simulator Project	Individual or Team
B. Self-paced Online Training	**As per Learning Plan**
• Technical Assistance Support through zoom channel, WhatsApp and Emails	Yes (2-Week)
• Learning Updates	Weekly
• Project Submission	Via SkillUp Support Email
Certificates	Program Certificate (all) + Winner Certificate (top 3)
Project Evaluation	By Mentor

Using Zoom Channel for Your Support

Finding Your Team Channel

- In the left sidebar, look for the Channels section.
- Your team channel will already be created and named (e.g., AI Racing League – 3Q 2026).
- Click on the channel name to enter.

FAQs

How will the training be delivered?

This cohort is project-based: after a live Orientation Session, learners complete a self-paced learning plan and the TORCS project with ongoing guidance from their mentor. There are no weekly live technical classes.

What if a learner needs help understanding the topic or a concept being taught? How can they get help?

Learners can reach their mentor anytime via Email, the WhatsApp community, or Zoom channel to get help with the learning plan or the TORCS project.

SkillUp

In collaboration with

IBM **SkillsBuild**

FAQs

What if a learner misses the Orientation Session?

We will post recordings on the LMS. Learners can log in anytime during the course to catch up if they miss the Orientation Session.

Is the Orientation Session mandatory?

Attendance at the Orientation Session is highly recommended so you understand the project, timelines, and how to get mentor support.

Will the Orientation and Closing Ceremony sessions be recorded?

Yes, Orientation Sessions are recorded and shared with all participants via the IBM SkillsBuild learning plan.

SkillUp

IBM **SkillsBuild**

FAQs

How long will learners have access to the recordings and study material?

The study material and session recordings will be available throughout the course. Learners can access them as often as needed during that time.

What is the internet speed required?

Internet speed should be a minimum of 5Mbps. Learners can check the speed of their connection through https://fast.com.

Do learners need a PC/laptop, or can they use their mobile to participate in the training sessions?

To attend the live classes or to view recordings/ learning materials, a learner can use their cell phone. Their phone needs to be a smartphone that is 4G enabled. However, they will need a PC/laptop to perform practical tasks.
